

TSD Series Wall Mounted Servo Motor Ac Voltage Regulator

Mod.: TSD-1500VA

Description:

TSD series AC servo regulator to improve the product design based on SVC series of products, with the delay, over-voltage and under-voltage protection, electric regulator freedom change excellent function, the wall installation, can effectively expand the use of space and streamline shape, soft colors, giving the visual sense to take on an altogether new aspect.

Products can be widely used in office equipment, testing equipment, medical equipment, industrial automation equipment, household appliances, lighting system, communication system and any other electric field.

Technical Parameters:

Input Voltage: Ordinary 160-250V, or optional larger range;

Output Accuracy: 220V \pm 3%, 110V \pm 6%;

Coil Material: Ordinary aluminum and copper mixed, full copper can be customized, please let us know when your place order;

Display: Ordinary meter type, LED or LCD display screen can be customized, please let us know when your place order;

Frequency: 50Hz/60Hz;

Adjusting Time: <1s (when input voltage has a change of 10%);

Adjusting Speed: >15V/s;

Waveform Distortion: No additional waveform distortion;

Efficiency: >95%;

Relative Humidity: \leq 95%;

Ambient Temperature: -5 ~ +40°C;

Dielectric Strength: 1500V/min;

Insulation Resistance: \geq 2M Ω ;

Packaging Detail: Standard Export Carton or Wooden Case And Colour Box Package

Manufacturer: Wenzhou Reelen Electrical Co., Ltd.
